Many people and specially teenagers think that being famous is one of the most awesome things that can happen.

Nevertheless, we should think about the following consequences.

In one hand, reaching fame involves the loss of privacy. When you are famous, everyday you have a lot of paparazzis who are looking for an exclusive for a tabloid. If you want to go out for a walk arround your city to go shopping for example, you will be sourrounded by a lot of people who wants to take a photo with you.

In the other hand, famous are usually wealthy, so this is an important for us. In Spain, for example, most people who appear on TV have not got any kind of studies. However all of them are rich.

In conclusion, it is better to be a creative person and make a fortune on your own than being famous, wealthy and lack of common sence.
