politics in not important. do you agree?

a lot of people think that politics is unimportant.personally,i think that although politics can be boring,it is very important to us.

firstly,it is clear that politics affects our everyday lives.it is a fact that politicians are responsible for education,housing and health.

these issues concern everybody,so politics is important to us all,even if we do not rezlize it.

secondly,politicians have the poqer to change our society. therefore qe all need to vote so as to express our opinions.if we do not vote,then we cannot complain when politicians do something that we do not like.

to sum up,politics is very important in our lives. in my view,we should all pay attention to what is happening in politics,and we should vote in orden to make our society a better place
